

## Quadmax

Dunlop ATV Tires enters a whole new realm of replacement tires with the introduction of the high-performance Quadmax. With the creation of this tire, Dunlop now offers ATV enthusiasts an elevated level of performance to tackle ultra-tough conditions while also delivering a new, aggressive tread pattern.

### FEATURES & BENEFITS

- Aggressive tread pattern engineered for superior performance in harsh conditions.
- The Quadmax features a flatter profile that provides a 5 percent larger footprint for added traction.
- Wrap-around shoulder element and sidewall elements look more aggressive and deliver improved side traction.
- The Quadmax offers improved handling and traction on all surfaces for superior performance.
- Tapered shoulder block design supplies smooth and predictable side grip.
- Big center block generates outstanding forward grip and mud traction.
- 45-degree center block design furnishes optimum forward and side grip.
- Specially stiffened carcass incorporates two nylon body plies laid at a rigid case angle to promote large-block stability through the contact patch.
- When tough riding conditions dictate that bigger is better, the new Quadmax delivers outstanding traction and handling.
